

## **HERITAGE COMMITTEE: REPORT TO THE CASCA BOARD, NOV. 2005**

submitted by Randall Brooks

The one initiative that I'm working on which probably should be OKed by the Board, is to work collaborative with the RASCs Historical Comm. on things that can be shared on our respective web sites. I've received word from their chair that they are willing to do this. I also met with Peter Broughton (past RASC Historical Chair) and Elizabeth Griffin here in Ottawa at the beginning of Oct. to plan out some initiatives. We're working on getting more PDFs of important papers that influenced Cdn astronomy (e.g. the paper from 1917 on site location of DAO) and gathering locations of archival collections holding records by significant astronomers -- that's one of the projects RASC members will be able to assist with.

Sorry it's so brief -- hopefully more to report in the next quarter.
